

HEALTH EQUITY & PERSON-CENTERED CARE IN NURSING HOMES

By prioritizing health equity and person-centered care, nursing homes can address health disparities and disproportionate outcomes among vulnerable populations.

WHY IS THIS IMPORTANT FOR NURSING HOMES?

Understanding recent changes to the Minimum Data Set (MDS) 3.0 and Social Determinants of Health will help your nursing home implement interventions involving health literacy, preferred language and social isolation.

HOW DOES HEALTH EQUITY AND PERSON-CENTERED CARE IMPACT NURSING HOMES?

Health equity and person-centered care are essential in nursing homes to ensure that residents' needs and preferences are met, and they receive fair and equitable healthcare regardless of their socioeconomic status, race or ethnicity.

HOW CAN TELLIGEN HELP?

Telligen has developed, gathered and collaborated on health equity resources, trainings and tools to support your quality improvement efforts. You can also request one-on-one enhanced technical assistance from a Quality Improvement Facilitator by visiting our website.
